

# BYOB website setup:

## Updating your DNS records

For us to set your website up we'll require you to update your DNS records. Please follow the steps detailed below and reach out to [marketing@loanmarket.com.au](mailto:marketing@loanmarket.com.au) if you have any questions.

### 4 step process:

- [Confirm your domain\(s\)](#)
- [We will supply you with A and CNAME records](#)
- [Add the A and CNAME records to your DNS provider](#)
- [Confirm that it's complete so we can check](#)

MY SITE

## Step 1: Confirm your domain(s)

Email [marketing@loanmarket.com.au](mailto:marketing@loanmarket.com.au) to confirm the domain name that you will use for your website (e.g. byobwebsite.com.au).

- You must already own this domain name - we do not purchase this for you.
- If you want to point multiple domains to your website, please provide all name variations e.g.
  - subdomain.byobwebsite.com.au
  - byobwebsite.com.au
  - www.byobwebsite.com.au

## Step 2: Here are you A and CNAME records:

Domain name	Record name	Record type	Record TTL (shown in seconds but converts to 3 hours)	Record value
silverwaterfinance.com.au	@	A	3600	13.248.211.111 76.223.87.53
www.silverwaterfinance.com.au	www	CNAME	3600	silverwaterfinance.com.au
_5fe958c246a03bb136b0ddf18ebae646.silverwaterfinance.com.au.	_5fe958c246a03bb136b0ddf18ebae646	CNAME	10800	_f06399f10932001d51f7ac0396fd920e.sdgjtdhzhz.acm-validations.aws.
_3b1ffb0293f4eb174014e4f0c9a47979.www.silverwaterfinance.com.au.	_3b1ffb0293f4eb174014e4f0c9a47979.www	CNAME	10800	_dc42f652d816cd727304c814176f139c.sdgjtdhzhz.acm-validations.aws.
				google-site-verification=BckqdLC7h5x4r8QaxaA0MM9ANVrGyYoJ4gl-WYvAjTQ

## Step 3: Add the A and CNAME records to your DNS provider

### 1. To point your domain to your new website you will need to:

- Create a new DNS record for your **hostname** using the **A record** we provided you with
- If you also want to point a **subdomain** to your website you'll need to update the subdomain using **CNAME record**

### 2. To create your SSL certificate you will need to:

- Add the **CNAME records** to your DNS provider

#### *How you do this will differ by provider, here are some helpful links:*

- How to add an A record to your DNS provider
  - Go Daddy: <https://au.godaddy.com/help/add-an-a-record-19238>
- How to add CNAME records to your DNS provider
  - Go Daddy: [How to add a CNAME record](#)
  - Crazydomains: [How to Add and Update CNAME Records](#)

If you are using a provider that is not listed above and you're unsure how to add the records, we recommend that your first Google "how to add a "A" or "CNAME" record to {provider name}" to see if there is some documentation online to help or make contact with your provider for support. If you are still having issues, please let us know.

---

## Step 4: Confirm you've added the A and CNAME records

Email [marketing@loanmarket.com.au](mailto:marketing@loanmarket.com.au) to confirm that you've added the CNAME records to your DNS provider. We'll check that your SSL certificate has been completed and that your website is rendering correctly.

---

### *Other things to note about your SSL certificate:*

Your certificate will automatically renew each year as long as certain criteria is met. If the domain name cannot be validated 60 days before renewal, the domain name owner (you) will be notified to complete the certificate renewal. Please contact [marketing@loanmarket.com.au](mailto:marketing@loanmarket.com.au) if you receive this notification and we'll help guide you through the process.
